

SUPPORTIVE CARE IN LOSS, GRIEF, AND BEREAVEMENT: AN INTERDISCIPLINARY APPROACH

13.MAR-26.APR.2023

SAP OVERVIEW

This SAP will consolidate learning, drawing on previous knowledge and skills to develop confidence and competence in managing holistic support of people during the process of loss, death and dying. The content of this module is such that students will be able to be more confident and competent in working with people who are experiencing a loss or have been bereaved. The support of those experiencing loss, including the ones suffering from traumatic losses (suicide, homicide, overdose...) and bereavement is a fundamental principle to dealing with suffering and existential issues. Students will be encouraged to routinely reflect on the work undertaken throughout the module and to apply this into practice to enhance compassion and competence when working with bereaved people who are experiencing a loss.

LEARNING OUTCOMES

At the end of this RUN-EU SAP, you will be able to:

- acknowledge the ethical, social, systemic and cultural issues that can affect attitudes concerning loss, death and grief in a post-pandemic world
- demonstrate a critical understanding of external social, cultural, and ecological influences which have a direct effect on bereavement care, and the strategies employed to facilitate the delivery of quality care services
- critically evaluate a variety of physical, psychological, spiritual, cultural, and social factors which impact people's experience of and responses to loss, grief and bereavement processes
- develop specific competencies and skills, including interpersonal, reflective, digital and soft skills required in loss, grief and bereavement processes.

Welcome and Opening Session

🕒 18h00-19h00

👤 Ana Querido (Polytechnic of Leiria)
Carlos Laranjeira (Polytechnic of Leiria)
Jennifer Moran Stritch (TUS)

📄 During the welcome and opening session, the kick-off of the SAP will take place. In this online session, students will meet the lecturers and gain an overview of the SAP programme. Additional inputs will be provided by the director of the Polytechnic of Leiria and other contributors to help students become familiar with the mission and values of RUN EU and the role of SAPs, including the wide range of opportunities available.

🕒 19h00-20h00

📄 This online session will be an open forum in which students will engage in icebreakers; students will present themselves to each other and their professional interests connected to loss and bereavement. Students will present in the group by sharing a personal or cultural object symbolising death and grief and then discuss the common and different visions about death, loss, and bereavement. The assessment and evaluation strategies for the SAP will be discussed and negotiated with students. Students will be assigned to a small collaborative working group for the duration of the SAP.

📄 Individuals with personal and/or professional experience of supporting loss and bereavement throughout adulthood will talk about their understanding of this phenomenon and the supportive needs of this group. The contributions of this panel will form the basis for a class discussion.

Workshop

Narratives of Loss and Bereavement in Adulthood Case-based Learning

🕒 11h15-13h00

👤 Group Work

👤 Ana Querido (Polytechnic of Leiria)
Carlos Laranjeira (Polytechnic of Leiria)
Jennifer Moran Stritch (TUS)

📄 Students will work together to discuss and analyse case studies of the effects of loss and bereavement in adulthood. The analysis will help to develop skills and knowledge that will inform the DST project.

Building a Digital Storytelling

🕒 14h00-17h00

👤 Mentored Group Work

📄 This group work session will be supervised by teaching staff with technical expertise in DST techniques, including designing and developing visual and audio components in DST production. Students will work together in their small groups to plan and build their DST piece. The group work will take place in the university's computer lab area where students will have access to computer and software tools for DST creation.
