

Researchers' Testimonials

Erika Geser-Engleitner
FHV · Austria
Research Mission at TUS

Erika Geser-Engleitner from FHV undertook her 4-week Research Mission at TUS in Ireland, exploring how elderly people in rural Limerick manage their everyday lives, which support systems they use and how the care systems differ from those in Austria:

'For me, it was a gift to dive deep into another system for a month and to enjoy researching. The effort to apply for a Research Mission is small in comparison to the wonderful possibilities it provides.'

Ádám István Szabo from SZE (Hungary), spent his 4-week Research Mission at FHV, researching in the field of Advanced Manufacturing:

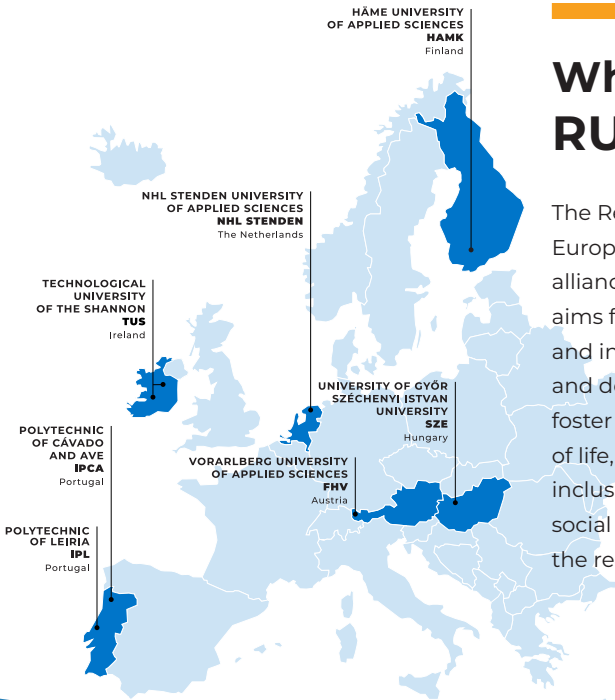

'I would recommend undertaking a Research Mission to other RUN-EU colleagues. They are ideal opportunities to gain experience, expand knowledge and build an international network. One of the best ways to build connections is by working together. We can read our papers but that's just the tip of the iceberg.'

What is RUN-EU?

The Regional University Network – European University (RUN-EU) is an alliance of European Universities that aims for excellence in research, teaching, and innovation, promotes joint activities and development of projects that foster European Union values and way of life, including multiculturalism and inclusiveness, as well as the sustainable social and economic development of the regions.

DID YOU KNOW YOU CAN:

- 1 Do an international Research Mobility?
- 2 Be a part of your own Research Area network?
- 3 Get involved on Innovative Research?
- 4 Find new collective funding opportunities?

What are the Opportunities for Researchers?

RUN-EU brings together researchers from all regions of Europe to create unique inter-university research spaces and teams.

Through the **Discovery Programme**, RUN-EU will create joint **RD&I teams** that will work on projects focused on RUN-EU's eight key research areas:

- Creative Art and Design & Materials Thinking
- Food & Biotechnology
- Tourism
- IoT & Cybersecurity
- Smart, Sustainable & Advanced Manufacturing
- Climate Change – Circular Economy & Decarbonisation
- Education & Social Sciences
- Health & Wellbeing

The RD&I teams work in collaboration with **RUN-EU Associated Partners**, regional innovation clusters and the **European Innovation Hubs (RUN-EIH)**.

RUN-EIHs are interregional networks using academic expertise and shared infrastructures to develop inter-university research, innovation, and regional stakeholder engagement opportunities.

RUN-EU supports the outward mobility of RUN-EU researchers and Master/postgraduate students who wish to engage in **Research Missions** at one of the RUN-EU higher education institutions. The purpose of the initiative is to support the creation and development of international research collaboration, and new networks, facilitating knowledge transfer within the alliance.
